# Pay Dock/Unpaid Leave/Service Records

This session will demonstrate how the software auto-creates the dock records and how these records affect TX Service Records.

- Unpaid Time Off transaction types discussion
- Time Off records affect on the TX Service Records discussion
- Time Off Configuration – Setup 'unpaid' leave options
- Pay Docks – Auto create dock pay records from the time off transaction(s)
- Time Off Code – Setup to 'Create Unpaid' transactions
- Roll Code – Affect on TX Service Records
- Service Records – Auto reduce number of days worked from time off record(s)
- Time Off Reporting – Verifying transaction type is appropriate for the leave type

Unpaid time off transactions auto reduce the number of days worked on the TX Service Record.

Unpaid time off transactions may be imported to a payroll worksheet to enable the system to auto create the dock pay records for the pay period.

HR\PA\CP\PW\PW - 2070 - Unpaid Time Off Import

This process will read through each employee's unpaid time off transactions that do not have an import date. A worksheet entry will be built for each unpaid time off transaction that matches the criteria. The employee must have a pay record with the Hourly or Daily pay code selected below. The worksheet record's account and rate information will be pulled from this pay record.

A verification report will print prior to building the Worksheet records. The selection parameters from the Worksheet Entry screen are used for this process.

Time Off Date Range: 01/01/1900 to: 09/17/2014

Daily Pay Code SALARY DOCK

This button will run the process.

Run Close SkyDoc

The system can auto create the time of code from Employee Access TO requests or during a 3<sup>rd</sup> party import as long as the code is set to create unpaid.
