# Maintaining a Training Database

# Maintaining a Training Database

- What is a Test Database?
- Test Database Policies
- Refreshing a Test Database “Do(s)/Don’t(s)”
- Demo: Refresh a Test Database

## Overview of Refreshing a Database

1. Export System Configuration from Training Database
2. Stop Training Database
3. Restore a backup of production database over the Training Database
4. Start Training Database (disable AI if active on production)
5. Start Training WebSpeed Broker (ex. wsEPlusTrn, wsFinTrn)
6. Import System Configuration
7. Pause All Scheduled Tasks
8. Restart Training Services (ex. CAS, Report Queue, SkyRAS)
