

Texas Skyward User Group Conference

HB 5 Compliance Part 1 – Curriculum Master

Sheryl Moulden – Mansfield ISD

Session Title

This session will cover how to create and maintain a curriculum master. The curriculum master works with graduation requirements, endorsements and the new 4 year plans.

- Purpose of a Curriculum Master
- Two options for a Curriculum Master:
 - One to One
 - One to Many
- Utility to Create a Curriculum Master – must be run from a campus level entity
- Curriculum Master
- Curriculum Master Reports
- Curriculum Master Utilities

Mass Create Curriculum Master Records

[Run](#) [Back](#)

Processing Options

This process will mass create Course Curriculum Master records from courses in the current entity. The course ranges and options determine which courses will be created. There are also several mass create options. It is recommended that the new Course Curriculum Master records be assigned to the corresponding course. Also, the utility can trace course history and assign previous years' courses to the curriculum master. The curriculum master records can be created for the current entity or as district-wide records. The district-wide records should only be created for an entity that has nearly all of the desired course keys. If the courses' subject code is not found in the district-wide subject table, a record will be created using the current entity's subject codes. Existing curriculum masters and subject records have the option of being overwritten.

Merge Curriculum Master Records

This utility will merge multiple Course Curriculum Master records into one record. After selecting a source and a target curriculum master, the pair can be added to the table holding curriculum masters to merge. The entity, course key, short description, and long description on the target curriculum master can all be changed. The merge utility will move all assigned courses from the source to the target curriculum master. By checking the appropriate option when adding, individual source curriculum master records can be deleted during the merge.
