Import Credit Card (100)

Credit Card Import

This is a 3 step process:

1. Submits a task to the print queue which retrieves records from the import file and validates the data.
2. When Step 1 has completed, select Preview Data To Process to view the record validation status in a browse.
3. Select Run the Update to create the selected Credit Card records.

The processing retains the name of the last import file.
When the Last File Imported is available, you can re-run the process using the same file.
Selecting a new file to import will import credit card records from the new file.
