Create Curriculum Master Records

**NOTE: Utility must be run from a
campus entity**

Mass Create Curriculum Master Records

[Run](#)
[Back](#)

Processing Options

This process will mass create Course Curriculum Master records from courses in the current entity. The course ranges and options determine which courses will be created. There are also several mass create options. It is recommended that the new Course Curriculum Master records be assigned to the corresponding course. Also, the utility can trace course history and assign previous years' courses to the curriculum master. The curriculum master records can be created for the current entity or as district-wide records. The district-wide records should only be created for an entity that has nearly all of the desired course keys. If the courses' subject code is not found in the district-wide subject table, a record will be created using the current entity's subject codes. Existing curriculum masters and subject records have the option of being overwritten.

Course Range and Selection Options
